

BDS-MPE-20K + BDS-MPE-50K

SURFACE MOUNTED SPILL CONTAINMENT FOR FUEL BLADDERS

FAST SETUP ★ SURFACE MOUNTED ★ CONFIGURED TO YOUR NEEDS

**CATASTROPHIC BLADDER
FAILURE TEST WITH 50K BLADDER**

Now there is a quick, easy to install, containment solution for all your mobile containment requirements.

Easier than ever to assemble, stronger wall segments, an absolute minimum of components, and no small fasteners to misplace! A simple wall clamp is used to secure the liner to the wall ... no need for sand bags, etc. Best of all, it is available at a price that works with your budget!

Surface mounted, all you need is:

- 1) the MPE wall system which best fits your needs,
- 2) add a liner, for full secondary containment.

System ships and stores in its own dedicated shipping container. Easy to transport to field with everything needed to quickly assemble and re-pack when Mission is complete. (20K Container has room to contain Bladder and Liner. 50K Container only accommodates containment system.)

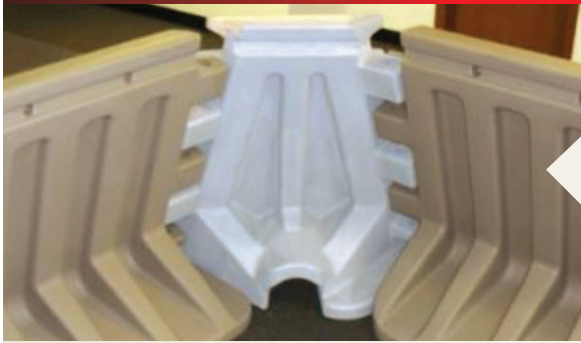

- FAST AND EASY TO SETUP
- NO SPECIAL LINER REQUIRED; WORKS WITH STANDARD MIL SPEC LINER FURNISHED WITH BLADDERS
- RUGGED CONSTRUCTION – LIGHT WEIGHT WALLS SUPPORT LOADS TO 600 LBS
- LINERS ARE SECURED WITH LARGE LINER LOCKS, NO DAMAGE TO LINER, DESIGNED FOR REPEATED USAGE
- ONCE ASSEMBLED WALLS ARE RESISTANT TO HIGH WIND LOADS, DON'T REQUIRE SAND BAGGING
- NO EXCAVATION OR ANCHORING TO SUBSTRATE REQUIRED
- FLEXIBLE USE IN COLD, HOT, OR MOIST ENVIRONMENTS
- NO HAND TOOLS OR SPECIAL LIFTING EQUIPMENT REQUIRED TO ASSEMBLE
- EASY TO OPEN AND CLOSE WALLS FOR ACCESS
- SHIPS AND STORES IN A DEDICATED SHIPPING CONTAINER

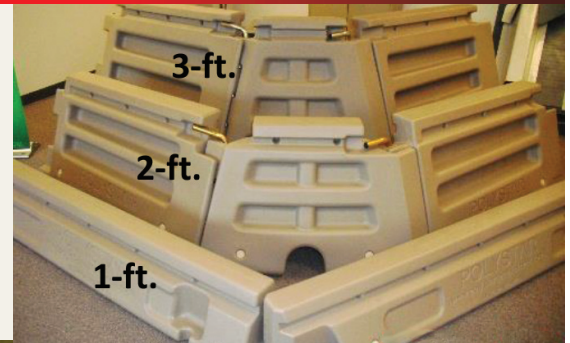

47 lb. walls are easy to handle. No special equipment is necessary for assembly.

Easy to transport. Easy to assemble. Easy to re-pack. Ships in its own dedicated shipping container.

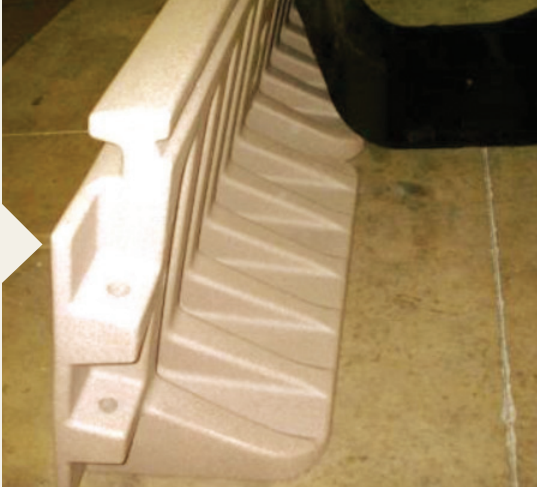

The 90 degree corner system includes a molded mouse hole for drainage pipes to release rainwater.

MPE walls now come in four wall heights ... 1-ft, 2-ft, 3-ft, & 4-ft.

Wall segments have been engineered with molded structural elements for maximum strength and ease of assembly! Walls slope to inside to throw the wave from a catastrophic Bladder failure back on itself!

MPE 2ft. & 3ft. are popular at oil drilling sites to contain the support equipment of Frat tanks and pumps.

A large steel rod locks the wall segments together. Slide the rod down to lock walls together. Cables are attached to the base of the wall with this Locking Rod.

Create an instant containment area for drums, transformers, generators, etc. with the 1ft. MPE walls.

Wall Segments are designed to nest tightly together for shipping & storage.

Rugged fiberglass clamps snap into molded grooves at top of wall to secure the liner in place. Trim off excess, or leave hanging. No sand bags!

Add the 1ft. MPE Riser to create a 4ft. wall for large ponds to 200,000g plus.
