

POLYSTAR
Containment

Poly Dike MPE®

Heavy duty, surface mounted, re-useable, secondary containment system.

- Rugged, yet low cost secondary containment system
- No excavation or anchoring to substrate required
- Modular design – easy to create custom-sized systems at every site
- Light weight, installed by as few as two people
- Portable
- Flexible use in cold, hot, or moist environments
- No hand tools required for assembly

MPE® Dike Wall

Polystar Containment now offers a complete line of MPE Dike Wall in multiple wall heights. The molded polyethylene dike walls are available in **1', 2', 3'** and **4'** heights making Polystar your one stop shop for secondary containment.

Our systems can be installed on any level surface for both temporary and permanent applications.

User friendly modular design for easy installation with no hand tools required.
