

POLYSTAR
Containment

Secondary Containment Solutions for the Municipality and Utility Markets

Polystar Containment, your safety and environmental partner, has been serving the Utility and municipality markets for 25 years. We are a leader in solving unique secondary containment issues. Polystar has installations around the globe, from the frigid cold of the Arctic to the extreme heat of the Saudi Desert, our systems provide the robust containment our clients need.

Polystar professionals understand how to design and build industrial products tough enough for any application. Finding the right containment solution in a hazardous environment and delivering that solution on time is paramount to our customers. Take advantage of our expertise in both steel fabrication and composite manufacturing to address your containment applications.

POLYSTAR Containment

Secondary containment needs in the municipality and utility markets are numerous. Polystar Inc. provides multiple solutions for a slew of containment applications. Whether temporary or permanent, Polystar's products provide efficient, reliable and economical containment to meet your needs.

- Temporary or Permanent
- Transformers
- Generators
- Fuel tanks
- Chemical tanks
- Odorant tanks
- Tanker trucks
- Rail cars
- Ponding or Lagooning
- And many more...

Avoid the headaches that come with concrete containment. Polystar provides containment that will not crack, requires no digging or site disruption, and our systems can be relocated if necessary. All while saving you the time and money associated with concrete containment.
